Full Stack Developer - Java, Spring, React

adam.nestor@gmail.com | (330) 620-9982 | Cleveland, Ohio

Full-stack developer specializing in Java, Spring Framework, and React. Experienced in building data-intensive applications with MySQL and integrating third-party APIs. Former educator bringing strong problem-solving and communication skills to development teams.

Practical Experience

We Make Good Software | August 2024 - Present

Full Stack Developer (Java, React, TypeScript)

- Developing the YEAH app using Java/Spring Boot backend and React/TypeScript frontend, implementing SMS messaging with Twilio API for course creators.
- Built high-volume processing pipeline with webhook-based bi-directional communication, focusing on complete message flow from initiation to delivery.
- Collaborating with AI team to integrate automated response system, implementing comprehensive status tracking and error recovery.

Personal Projects

CourtVision | [Backend Code](#) | [Backend Code](#)

Full Stack Developer

- NBA prediction accuracy tool built with Spring Boot and React, using BallDontLie API to track historical hit rates and generate daily confidence scores.
- Built responsive dashboard with Spring WebFlux backend and React Query frontend, using Recharts for real-time data visualization.
- Designed MySQL database schema and Java algorithms to process 100K+ daily statistics for generating player performance predictions.

ServiceTally | [View Website](#) | [View Code](#)

Full Stack Developer

- Built Java/Spring Boot application with Spring Security for managing student service hours, using MySQL for data persistence. Deployed on Railway with CI/CD pipeline.
- Developed responsive frontend using vanilla JavaScript and CSS, implementing role-based access control for multiple schools.

Education

Full-Stack Software Engineering Bootcamp

Coders Campus, Remote, December 2023 - August 2024

- Learned full-stack development through building Java/Spring Boot applications with REST APIs and MySQL databases.
- Built secure applications using Spring Security and JUnit testing while following Agile development practices.

M.S. Education

The University of Akron, Akron, Ohio | May 2012

B.A. Philosophy

The University of Akron, Akron, Ohio | May 2010

Additional Professional Experience

High School Teacher

- Lake Catholic High School | August 2021 - Present
- Cleveland Central Catholic High School | August 2020 - August 2021
 - Created engaging theology lessons and simplified abstract concepts for students.
 - Organized retreats, coordinating logistics for students, parents, and faculty.

Director of Youth Ministry

- St. Joan of Arc Catholic Church | June 2018 - August 2020
- Holy Martyrs Catholic Church | June 2016 - June 2018
 - Directed youth programs, managing 65+ volunteers and 350 participants across events while focusing on planning and impactful collaboration.
